

## AMERESCO IN THE UNITED KINGDOM

Ameresco, Inc. is a leading provider of comprehensive energy efficiency and renewable energy solutions for organisations throughout Europe and North America, delivering long-term value through innovative systems, strategies, and technologies. Ameresco's solutions range from upgrades to facilities' energy infrastructure to the development, construction, and operation of renewable energy plants combined with tailored financial solutions. We work with customers to reduce operating expenses, upgrade and maintain facilities, stabilize energy costs, improve occupancy comfort levels, increase energy reliability, and positively impact the environment.

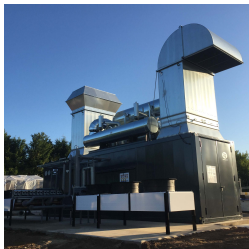

## PROJECT SHOWCASE

Ameresco has a global presence and local expertise across 70+ office locations in the geographies that we serve. In the United Kingdom, we have local offices and expertise in London and Leeds. Work with the Ameresco team to leverage the world's most advanced energy technologies backed by project managers who know your community. Our vendor independence enables us to deploy the most innovative energy solutions across markets including councils, universities, healthcare facilities, retailers, and industrial campuses. The projects highlighted below showcase best-in-breed examples of Ameresco's experience.

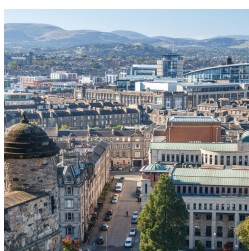

### National/Municipal Government: Manchester City Council

Ameresco is helping Manchester City Council achieve their carbon neutrality goals through a multi-year, multi-phase performance contract. Under one of the largest local authority energy performance contracts (EnPC) to be tendered in UK, project phase one includes over 3MW of PV solar. Phase two will include the electrification of the City's car fleet with charging from significant PV arrays and battery storage.

### Healthcare: Frimley Health NHS Foundation Trust, Wexham Park Hospital

Ameresco designed and built a new centralised energy centre at Wexham Park Hospital. The ageing, existing steam heating plant was replaced with a Combined Heat and Power (CHP) based low temperature hot water (LTHW) heating and domestic hot water (DHW) system. Ameresco will operate the plant for fifteen years guaranteeing cost and carbon savings.

### Higher Education: Four Scottish Colleges

Edinburgh College, Borders College, Newbattle Abbey College, and West Lothian College joined forces on an EnPC with Ameresco. This was the first large, multi-site EnPC project awarded and delivered through the Scottish Government's Non-Domestic Energy Efficiency Framework. Across twelve campuses, Ameresco identified opportunities, installed energy conservation measures, and guaranteed savings.

## AMERESCO BY THE NUMBERS

SECURED OVER  
**£2 BILLION**  
IN PROJECT  
FINANCING

SOCIALLY RESPONSIBLE.  
ECONOMICALLY EFFICIENT.

DEVELOPED  
OVER  
**300 MW**  
OF RENEWABLE  
ENERGY  
PROJECTS

**£781 MILLION**  
BONDING  
CAPACITY

DELIVERED OVER  
**£4 BILLION**  
IN ENERGY SOLUTIONS

MORE THAN  
**1,000**  
EMPLOYEES

**70 OFFICES**

THROUGHOUT THE UNITED STATES,  
CANADA, AND THE UNITED KINGDOM

BRINGING LONG-TERM VALUE TO CUSTOMERS **SINCE 2000**

## OFFERINGS, CAPABILITIES, SOLUTIONS

As a comprehensive energy solutions company, Ameresco provides value-added energy efficiency, renewable energy, and infrastructure upgrade solutions to support our customers' unique requirements. Our core business is the development, design, engineering, and installation of projects that reduce the energy and operations and maintenance (O&M) costs of our customers' facilities. These projects generally include a variety of measures that incorporate innovative technology and techniques, customized for the facility and designed to improve the efficiency of major building systems, such as heating, ventilation, cooling, and lighting systems, while enhancing the comfort and usability of the buildings. Such measures may include a combination of water reclamation, light-emitting diode (LED) lighting, smart metering, intelligent microgrids, battery storage, combined heat and power (CHP), the installation of renewable energy, and distributed energy options. Ameresco also offers budget-neutral solutions and provides the resources needed to successfully plan, execute, and assist with financing each customer's energy project.

### Ameresco's Procurement Frameworks:

- Carbon Energy Fund (CEF)
- Essentia
- Re:fit
- Scottish Non-Domestic Energy Efficiency (SNDEE)
- Yorkshire Purchasing Organisation (YPO)
