Aspire **smart**sync® / Wireless nurse call solution

IT'S THE **SMARTSYNC TECHNOLOGY** THAT MAKES THE DIFFERENCE

Static Systems Group is proud to set the standard and lead the way in wireless nurse call technology.

Aspire **smart**sync® AT A GLANCE

- **Extended battery life and reduced cost of ownership:**

smartsync® technology significantly increases battery life allowing for the use of readily available AA batteries.

- **Wireless over door units:**

The **smart**sync® protocol means that for the first time wireless battery powered over door units, with full follow-the-light operation, can be used.

RNIB endorsed patient hand unit with optional bedlight control

- **Ease of installation:**

The system has been designed for straightforward 'out of the box' installation and set-up. All programming is managed through the indicator, making it easy to change room descriptions, adjust volume and make additions or deletions.

- **Comprehensive system health checking:**

All devices are routinely scanned every 60 seconds, 24/7 to ensure missing devices, low battery or out-of-range alerts are raised swiftly.

- **Unrivalled system integrity:**

Each task raised is verified by the system before notification is given.

- **Enhanced reliability:**

System configuration is backed-up to an SD card within the **Aspire smart**sync® gateway. In the event of a system fault, simply swapping the SD card to a new unit will quickly get the system operational again.

- **Robust, SmartFit enclosure:**

Fit for use in a healthcare environment, with time saving features to assist with installation and maintenance.

Remote nurse call button also available

- **Consistent component design and operation:** **Aspire smart_{sync}**[®] component design is consistent with that of wired systems, offering familiarity to both patients and staff.
- **Full compliance:** **Aspire smart_{sync}**[®] devices are fully compliant with HTM 08-03 and in addition meet the European Standard ETSI EN300 220-1 for short range devices operating at 868 MHz.
- **Scalable:** **Aspire smart_{sync}**[®] uses Fusion-IP protocol. It is capable of operating standalone, or seamlessly alongside our wired nurse call to form a truly integrated system.

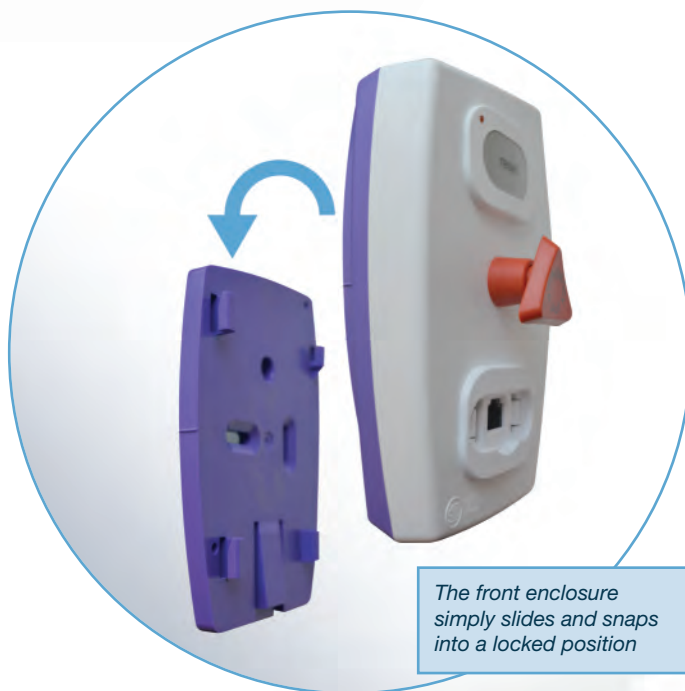

Truly wireless over door unit uses standard AA batteries

SmartFit – enhanced enclosure design

SmartFit is our new and improved **Aspire smart_{sync}**[®] enclosure design. It comprises a mounting plate which fixes directly to the wall, and a front enclosure with an open back - allowing immediate access to batteries once removed from the back plate.

The front enclosure simply slides and snaps into a locked position

Aspire smart^{sync}[®] / Wireless nurse call solution

EXTENDED Aspire smart^{sync}[®] SUITE

Aspire smart^{sync}[®] products are all truly wireless and use standard, off-the-shelf alkaline AA batteries.

Our range includes:

- Staff indicators and Displays
- Over Door Units
- Pull Cord Units
- Patient Hand Units
- Door Exit Alarm
- Staff Presence
- Cardiac Alarm
- Toilet Call
- CDC Indication

Aspire smart^{sync}[®] works with FusionWare[™] task management solutions, providing a range of enhanced facilities, including a messaging platform to connect to third party smartphones, tablets and other similar mobile devices. Helping to deliver improved efficiencies and greater patient satisfaction with the familiar look and feel to Static Systems' wired solutions.

Static Systems Group: Your dependable partner

- Unrivalled experts in advanced nurse call technology
- In-house development and support. We design and manufacture both wireless and wired nurse call, so offer impartial advice on the most suitable solution
- An established and trusted name
- Extensive experience working in live ward environments
