

# Commissioning Services

**URMSON LLP IS AN INDEPENDENT HVAC AND WATER SYSTEMS COMMISSIONING AND SURVEYING ENGINEERING COMPANY WITH OVER 27 YEARS EXPERIENCE**

We have a level of expertise that benefits a vast range of clients. These include manufacturing and factory sites, NHS, hospitals, schools, colleges, universities, retail outlets, public buildings, housing developments, offices, commercial and domestic buildings.

In the building industry all work covered under Part L of the Building Regulations should be commissioned and documented in accordance to the design specification. All our commissioning works are carried out to the current and relevant British standards while following CIBSE / BSRIA guidelines to ensure all projects are handed over efficiently and on time.

*“ Our commissioning services are carried out by professionally trained, experienced engineers to ensure your equipment is set up to function correctly and efficiently in order to optimise its performance. ”*

Our collaborative and proactive approach drives efficiency, cost savings and offers our clients peace of mind. We are committed to continuous improvement, through innovation and investment in our personnel, methodologies and equipment.

We offer extremely competitive rates and daytime and evenings to offer minimal disturbance to our customers.
