MEDIPLUMB INSTALLATIONS
Medical & Industrial Gas Specialists

An Introduction to MPI

Medical + Laboratory + Industrial Gas Specialists

I founded **Medi Plumb**, or **MPI** as we are known today, with my business partner after being in the pipefitting industry since the age of 18 and realising I had the experience and work ethic to make a go of my own business. As with all things there have been ups and downs but fortunately the ups far outweigh the downs!

Having your own business can be very rewarding but also hard work, what helps is having a great team, both in the office and on the road to ensure we meet the ever growing needs of our customers. We have recently undertaken an internal project to investigate what I and our team here at **MPI** believe to be the businesses core values we now ensure these are considered in everything we do as a company;

+ INTEGRITY

+ EFFICIENCY

+ FLEXIBILITY

If you are looking for a well established family owned business who truly care about its clients across the UK then why not give us a try? Myself and the team are ready to assist however we can or even if you simply have a query about your current pipeline system at your premises please get in contact. Have a read through the following pages and if you think any of our services could be of interest then please give the team a call or pop us an email. Thanks for reading,

Mr Paul Tierney
MGPS AP
Managing Director

Why MPI?

Established in 2005 MPI (Medi-Plumb Installations) have worked hard making it the business it is today; offering a full design, consultation, installation and commissioning service for Specialist Gas systems. The company was created when Managing Director and founder; Paul Tierney identified a clear gap in the Medical and Industrial Gas market to provide a fresh, innovative and customer orientated experience for specialist gases installations. After listening to feedback from professionals within the industry it was clear that three key elements were important and these helped form the company philosophy;

- ✦ The right price for the right solution
- ✦ Quality Workmanship
- ✦ A proven track record with the capability to consistently deliver

With a growing customer base and an increasing amount of repeat business, the emphasis that as an organisation we put on quality, and the level of service that all of our customers receive is key to our current and future success. The continual reinvestment back into the business year on year demonstrates we want to be here for many years to come and to continue to delight our customers.

At **MPI** we are able to Design, Supply, Install, Test, Commission and Maintain Medical Gas systems fully in compliance with HTM 02-01. We have carried out works ranging from replacing Medical Air Plants, to full Operating Theatre and Recovery Suite Medical Gases Installations across the UK for both NHS and Private Hospital organisations, we know the level of service and attention to detail that is expected within the industry.

At **MPI** we ensure our installation engineers are, as a minimum, MGPS CP and CSCS accredited with valid Asbestos Awareness, iPaf, PASMA Certification, and ongoing training is provided to help maintain our high quality installation standards.

Some of the Medical Gas Services we can offer include;

- + New Installations, Refurbishments and Maintenance of all systems
- + Auto CAD as fitted drawings & site surveys
- + New Medical Air, Vacuum, AGSS Plants & Manifolds
- + Medical Gas Alarms
- + Temporary Shut downs and Back-feeding of Services
- + Pharmacist QC Services
- + Design & Verification of Medical Gas Pipeline Systems
- + MGPS AP Services
- + Dental Surgery Installations
- + Veterinary Surgery Installations

Laboratory Gas installations have become a key part of our business. We are members of BCGA and ensure all our works comply with their codes of practice. We have completed projects in the Education and Research & Development sectors for a variety of clients that include; Universities, Colleges, Laboratories and Pharmaceutical companies across the UK.

We are able to undertake new installation works, refurbishments or servicing and maintenance of existing specialist gas systems.

Please have a look below at some of the associated laboratory gas services we can offer;

- + Degreased Copper Pipeline System Installations
- + Orbital Welded Stainless Steel Pipeline System installations (Including Coax)
- + Twin Ferrule Stainless Steel Pipeline System Installations
- + Extruded Aluminium Pipeline Systems Installations
- + UPVC / ABS Solvent Welded Pipelines
- + Gas Generation Plants
E.g. Nitrogen Generators
- + Oxygen Depletion & Gas Detection System Installations
- + Gas Proving System Installations
- + Manifold / Plant External Storage (Cages / GRP Enclosures)
- + WSE's to meet requirements of PSSR 2000

Going hand-in-hand with our Medical and Laboratory Gases Service offerings, the number of successfully completed Industrial Gases projects

continue to grow year on year, working with large and long established businesses in the Steel and Fabrication industry on a regular basis. Whether it is

offering BCGA compliant annual inspections for existing systems, or providing a design and proposal for a new specialist gases system, we can help!

Please check out some of the Industrial Gases associated services we are able to offer;

- + Welding Gas Pipeline Systems (Oxygen, Acetylene, Propane, Argon etc)
- + Compressed Air & Vacuum Pipeline Systems
- + Plant & Area Alarm Systems
- + Systems in Copper, Stainless Steel, Aluminium & Galvanised Steel
- + Gas Proving Systems
- + Gas Detection & Oxygen Depletion Systems
- + HDPE and HPPE Mechanical, Fusion & Solvent Welded Systems
- + Solenoid Valve Control Systems to Isolate Pipeline Systems
- + Annual BCGA Pipeline System Inspections (MSE)
- + Existing System Site Surveys & as fitted Auto CAD drawings

Don't just listen to us

Since our formation we have been lucky to work with many respected and long established names within the construction industry but also numerous NHS Trusts, Universities, Colleges & Laboratories.

Below is a small selection of customers we have worked with over the years and some comments on the service they have received from the **MPI team**.

“Medi Plumb and their installations & management team completed the works in an effective, efficient and pro-active way”

“Their site staff were professional, worked diligently and as a company, Medi Plumb scored highly on our internal Health & Safety Site League”

“We would have no hesitation in using Medi Plumb again and are planning on doing so on another project for the same client planned for next year”

“Your engineers are well versed with the HTM, approachable and willing to go the extra mile”
