

Switch to Safer Infection Prevention

with completely hands-free technology

Replacing your current macerator with a completely hands-free alternative is one of several enhanced infection prevention and control measures healthcare facilities have adopted during the COVID-19 pandemic to minimise the risk of infection spreading.

Studies found there are over 93 contact episodes per hour between patients, staff and visitors, demonstrating the potential for cross-infection¹

We've made the decision to upgrade to the new completely hands-free Vortex+

VORTEX+

NPC CODE: FSE202 | PRODUCT CODE: 2040ZA001

Protect Patients and Frontline staff

Vernacare's Vortex+ protects staff through completely hands-free operation, minimising the risk of spreading SARS-Cov-2 & other pathogens in highly infectious environments.
