

The AVM validation section provides a commissioning/validation service on decontamination equipment to NHS, private healthcare, pharmaceutical and commercial clients.

All validation and calibration activities are conducted in accordance with current standards and to satisfy the needs of the client and regulatory authorities.

The validation team comprises of nationally accredited Test/Maintenance (Competent) Persons.

The services provided by the validation section include:

- Weekly/quarterly/annual validations on porous load, unwrapped instrument, pharmacy, laboratory, hot air and gas sterilizers.
- Weekly/quarterly/annual validations on washer disinfectors for instruments, endoscopes and human waste containers.
- Maintenance and breakdown service on bench top sterilizers for GP, dentists and PCT clients.
- Steam/water quality testing.
- Microbiological tests (sent to an independent testing laboratory for analysis)
- Commissioning of decontamination equipment

Upon successful completion of our validation audit on your decontamination equipment, we'll produce a written report of all the validation work carried out.

Our decontamination validation and calibration activities are conducted strictly in accordance with current standards of UK regulatory authorities and our validation team comprises of nationally accredited Competent Persons (Decontamination).

Should you require any further information on how this service could enhance the management of decontamination within your hospital please contact the AVM office who will be happy to assist you.
