

A Healthcare Engineering Roadmap for Delivering Net Zero Carbon

The Carbon & Energy Fund is to announce that in partnership with IHEEM and HEFMA, we have commissioned a guide to assist Trusts meet the Net Zero carbon targets set out in the NHS strategy “Delivering a ‘Net Zero’ National Health Service”. The guide builds on previous work and sets out a clear three staged approach to decarbonising NHS Estates. The guide has been developed and reviewed by experts from across industry and the NHS. It draws on real NHS project experience as well as reviewing emerging and future technologies and explores how Trusts can develop strategies that decarbonise now whilst simultaneously preparing for future innovation.

The objective of the day is to introduce the Guide, which will provide an excellent platform and reference point for you to work with, alongside discussions on decarbonisation and what it means, a Trust’s real-life journey of progressive decarbonisation plus helpful tips on any future funding available via Salix Finance.
