LEISURE AND RECREATION

From adventure parks and days out to camping holidays

Versatile solutions from KWC DVS Water Systems UK

KWC DVS Water Systems provides intelligent sanitaryware and washroom products for public, semi-public and commercial facilities. From washrooms, shower rooms and toilet facilities to cleaning and hygiene areas, KWC DVS Water Systems offer a comprehensive range of versatile product solutions.

Our technology and material expertise

KWC DVS Water Systems have designed and developed a range of product technology in the highest quality materials in order to provide high performing solutions. From our patented FRAMIC innovation cartridge to our Miranit composite material, we have a products for every environment. Our range of products for leisure and recreational environments is limitless and includes stainless steel and Miranit solid surface washbasins and washtroughs, free standing and wall mounted soap and hand sanitiser dispensers, a vast range of sanitaryware, taps, accessories, cleaning, janitorial and catering equipment.

Specification considerations

When designing washrooms for high usage areas such as campsites, leisure parks and other attractions, it is important to consider the types of products and how they cater to all users needs. Campsites in particular will need to have products available that are able to cope with a high number of users and be fit for purpose, catering to everyone's needs. Considerations may include adding a higher number of washbasins in the toilet facilities, after all this will be the main port of call for users brushing their teeth, washing hands, showering, and using the toilet. Therefore, it is important to consider high quality robust sanitaryware and the correct amount of products when designing and purchasing products for these areas.

SOAP AND SANITISER DISPENSERS

Perfect for the entrance of any building

Liquid soap and hand sanitiser dispensers

Manufactured from high quality durable stainless steel, these free-standing soap and sanitiser stations are ideal for almost any environment, from campsites to large holiday parks, whether it be in the visitors centre, or outside food courts and restaurants. Each unit can be easily refilled, either through the key lock fronts (KWC DVS branded versions) or access panel (DVS branded versions). The battery operated touch-free operation and free-standing design adds ultimate flexibility when positioning. For outdoor adventure parks and leisure activities, bespoke outdoor dispensers are also available on request, please get in touch to enquire.

Bowl dims: 355 x 100 x 355mm (W x H x D)

ANMT2001 203.0598.590 Without tap ledge

ANMT2002 203.0598.591 With tap ledge

MODERN COMPOSITE WASHBASINS

The RONDAtop and QUADROtop countertop washbasins provide a modern design along with hygiene benefits. These eye catching centrepieces have been designed with a unique, integrated seal, providing a streamlined and hygienic finish with easy installation, making additional sealing with silicone is a thing of the past. Manufactured from Miranit composite material, the solid surface basins easily transform the whole washroom and can revamp the overall look and space.

Miranit is a poured material and manufactured using a single mould creating a finished product without any adhesive seams or joints. Complement the washbasins with an elevated tap from the F5 range.

PLANOX WASHTROUGHS

Seamlessly welded stainless steel washtroughs

Stainless steel washtroughs

The Planox range of washtroughs offers a functional, easy-to-clean and user-friendly solution whilst ensuring optimum hygiene. Manufactured from 1.2mm thick grade 1.4301 (304) stainless steel with a satin polished finish, these troughs can withstand high usage areas and busy areas such as theme parks, sports centres and holiday parks. The troughs are seamlessly welded using an innovative robotic laser, making them highly resistant to dirt and bacteria. The 1cm lowered tap ledge stops water from spilling on to the floor, preventing hazards and maintaining excellent levels of hygiene.

COMPLETE THE WASHROOM

Water saving taps

F3 and F5 range of taps

In highly frequented washrooms such as holiday park toilets or outdoor leisure washroom facilities, it is important to choose taps which reduce the impact of water wastage and vandalism whilst ensuring efficient hygiene.

The F5 range of taps excel in functionality and style and come in three ranges; electronic, self-closing and lever taps. All KWC DVS F5S self-closing taps have been designed with the patented KWC DVS Modular Innovation Cartridge (FRAMIC). The cartridge ensures stagnation-free, hydraulic control of the water flow and sets the highest hygiene standards.

The F3 range has been designed with a classic look in mind. The traditional and elegant design of the F3 self-closing mixer taps are ideal for smaller washroom environments such as visitors centres.

*F5S taps only

F5S SELF-CLOSING PILLAR MIXER*

F5S-Mix self-closing pillar mixer with adjustable, turn-proof temperature stop. Designed with the FRAMIC self-closing cartridge. Nominal 5 litres per minute flow rate.

F5SM1001 208.0563.593

F5S SELF-CLOSING PILLAR TAP*

F5S self-closing pillar tap (pre-mixed) with adjustable flow duration. Designed with the FRAMIC self-closing cartridge. Nominal 5 litres per minute flow rate.

F5SV1001 208.0563.594

F5L-MIX PILLAR LEVER TAP

Designed with a mixing cartridge with ceramic disc technology and thermostatic protection from scalding. Nominal 5 litres per minute flow rate.

F5LM1001 208.0563.550 100mm project.

F5LM1002 208.0563.591 125mm project.

F3S SELF-CLOSING PILLAR TAPS

Hydraulically controlled self-closing function which prevents water from flowing back through the system. Nominal 3 litres per minute flow rate.

F3SM1001 208.0563.601 mixer tap

F3SV1001 208.0519.518 pre-mixed

F5EM1001

*The KWC DVS Modular Innovation Cartridge (FRAMIC)

The ceramic self-closing cartridge is the first of its kind in tap disc technology and enables a stagnation-free, hydraulic control of water flow ensuring perfect water hygiene. The operation of the cartridge is flow pressure-independent meaning drinking water is kept completely separate to the functional elements of the tap.

CAMBRINO BABY CHANGING TABLES

CAMBRINO BABY CHANGING TABLES

Whether you are visiting an adventure park or away on an outdoor holiday, it is important when you are out and about with young children that the correct facilities are available. KWC DVS Water Systems have designed flexible and modern baby changing tables for wall mounting which can be integrated into almost any washroom environment or baby changing facility.

The range has been developed with two design options (horizontal or vertical) to fit any space, and with a stainless steel or Polypropylene finish in order to complement any style of modern washroom. The Cambrino baby change units are manufactured with antibacterial Biocote® materials and comply with BS EN 12221-1 and EN 12221-2 standards, ensuring a hygienic, safe and practical solution.

COMPLETE THE WASHROOM

Touch-free water saving taps

High performance touch-free taps

Hand washing has never been so important as it is today. The touch-free range of taps provides ultimate flexibility in the washroom for any leisure or holiday environment. With three different ranges; F5E, Aquarius wall mounted straight spouts and the Classic range there is a solution for any size or type of washroom. The range of taps are all electronically controlled and provide a hygienic touch-free hand washing solution even in the busiest of environments. These WRAS approved taps come in a range of finishes, from satin and high polish grade 316 stainless steel to high polished chrome plated brass. The range is fully programmable with additional functions such as hygiene purge, lockouts and anti-vandal features. DVS and KWC DVS hand held programmable remotes are sold separately.

G20118N	205.0000.059	1800 x 300 x 555mm (13.5l)
G20119N	205.0000.060	2400 x 300 x 555mm (13.5l)

STAINLESS STEEL URINALS

Over half of 'domestic' water used in commercial premises can be due to urinals operating without flush controls. Adding the correct flush controls such as DVS Flushmatic, or installing waterless products can vastly reduce water bills with minimal initial outlay, particularly in high usage areas such as theme parks, holiday parks and more.

All KWC DVS branded urinals are manufactured from robust 1.2mm thick grade 1.4301 (304) stainless steel with a satin finish. The urinals have been specifically designed for easy installation and maintenance.

CATERING SOLUTIONS

Stainless steel solutions for all recreational environments

Catering and hand washing

KWC DVS Water Systems has a range of solutions for theme parks, bowling alleys, outdoor adventure parks and more. The range includes catering sinks, preparation tables and a variety of wall shelves. Manufactured from grade 304 stainless steel, this material is highly durable, resistant to corrosion and long lasting. Stainless steel is the perfect material for any large catering environment from campsite canteens to holiday park food courts and restaurants. A range of optional supports, stands and shelves (sold separately) and complementary parts including taps and waste kits provide a full solution.
