

Learn about Emergency Lighting and Dynamic Safety Sign Systems

Our flexible training module on emergency light testing includes:

- An overview of BS 5266-1 – the code of practice for the emergency lighting of premises
- How to comply with the legislative requirements
- How to be proactive in maintaining and upgrading your emergency lighting
- Emerging technologies such as dynamic safety sign systems

We can deliver the CPD in a variety of ways to suit you.

We offer sessions remotely via Zoom, Teams, in-person at our Newcastle upon Tyne training centre, or at your premises – over a working lunch or in more extended form with in-depth explanations and time for questions and answers.

Please get in touch to find out more/discuss your needs.
