# ABOUT PEREGA

Perega has been established in the UK for 75 years. Always independently owned, we became an employee owned trust in 2019. We have crafted a deserved reputation of engineering excellence with our knowledgeable, forward thinking and collaborative approach. Perega takes pride in our long term relationships with our customers, some of whom we have worked with since we were founded.

Perega operates from six regional offices in Belfast, Birmingham, Guildford, Leeds, London, and Southend-on-Sea. We employ approximately 65 people with engineering experience stretching from apprentices to chartered engineers. This gives a broad spectrum of qualification and experience to bring different perspectives to every job. It also gives us the flexibility to deliver projects ranging from minor to major works.

We undertake commissions in many areas of civil, structural and glass engineering as well as building surveying. Projects include major town centre redevelopments, residential, retail, healthcare, retirement living, education, historic, leisure and commercial. The firm has a reputation for solving unusual and complex technical problems, early guidance in the design of infrastructure and civil works, and a long history of expert witness and insurance work.

# OUR VISION, MISSION & VALUES

## OUR VISION & MISSION

WE AIM TO BECOME ONE OF THE UK'S CONSULTANCIES OF CHOICE, KNOWN FOR FORWARD THINKING, AND ALWAYS BEING OPEN TO NEW IDEAS AND COLLABORATION. WE'LL DO THAT TOGETHER, BY EMPOWERING OUR OWN PEOPLE AND WORKING DYNAMICALLY WITH OUR CLIENTS.

## OUR VALUES

- **Enriching our community**
- **Collaborative**
- **Forward thinking**
- **Passionate**
- **Approachable**

**PEREGA**

# WHY PEREGA

- Collaborative team players, actively contributing to solving challenges from early in a project.
- Solution focused approach to design, delivering value for money.
- Expertise in different construction forms and materials, advising on the relative engineering merits.
- Joined up and integrated service on a nationwide basis, sharing sector experience and local knowledge.
- Approachable we are open and friendly, making expertise accessible.
- We identify risk and develop solutions for mitigation from the outset.
- Passionate about what we do with a commitment to our customers for continuous improvement.
- Experts in our field, we invest in training and development of our staff at all levels.

PEREGA

# DIGITAL CONSTRUCTION

Perega is committed to modern design and management techniques. The use of technology provides efficiency in project delivery, seamless collaboration and inspiring and straightforward visuals for client understanding. Each of our offices has three-dimensional design and BIM capabilities.

We've been using Building Information Modelling (BIM) for over a decade. BIM allows for a more collaborative approach to building projects, as people can work together using common data in a shared environment which enables us to deliver efficiency for our clients. We have completed BIM stage Level 1 & 2 projects, including standalone 3D models, with in-house interoperability between design software, as well as full model collaboration with architectural disciplines, which has proved invaluable in clash detection and mitigation.

The use of Revit, integrated with our design analysis tool, has provided Perega with an extremely efficient methodology of model production. The BIM workflow involves creating and using an intelligent 3D model to inform and communicate project decisions. Our BIM protocols highlight the need for high standards which enhance design, visualisation, simulations and collaboration.

# CSR / SOCIAL VALUE

At Peregá, we recognise we are fortunate and therefore, should use our knowledge, expertise and abilities to create social capital and support those who are not so fortunate.

We create an environment for staff to undertake social value initiatives both on a personal and corporate basis. Activities range from helping at ad-hoc events, running scout groups and amateur sports clubs to governorships at schools.

Annually, we offer work experience placements for local schools and colleges, plus paid summer work experience/internships which have structured outcomes to benefit students. Our staff also support students with practice interviews and CVs. We have an active apprenticeship scheme and graduate training scheme leading to the Institution of Civil Engineers or Structural Engineers professional qualifications.

Every year, staff vote on a corporate charity and events are organised across all offices to raise money. Activities to date have included making cakes, running marathons, The Ride 100 and a team taking part in 'Tough Mudder'.

We are committed to generating a positive impact on the community and the environment through our activities on many levels. We strive to show a sense of responsibility in our designs and ensure we work in collaboration with the wider design team to minimise the environmental impact and maximise the positive social impact our projects have.

# KEY FACTS

- Established in 1947, we have been providing independent advice for 75 years
- 65+ dedicated and loyal staff
- Wholly owned independent practice
- One of the first engineering consultancies to adopt BIM
- Over 80% of our business comes from repeat customers
- Strength and reliability through financial robustness
- One of the first firms of consulting civil and structural engineers to obtain ISO 9001 accreditation for our QMS
- Award-winning projects
