

# SFG20

## The definitive standard for **building maintenance**

Completely unique, SFG20 is the essential maintenance software tool for facilities managers, building owners, contractors and consultants.

An interactive web-based service, SFG20 has a growing library of dynamically updated maintenance task schedules, covering many equipment types and over 1200 individual schedules including Specialist Services Sets.

### What can SFG20 bring to your organisation?

- **Cost savings** via optimal asset maintenance:  
Colour-coded criticality ratings identify frequency and importance of tasks, avoiding over or under maintenance.
- **Peace of mind** with up-to-date legislation:  
Schedules are updated in-line with legislation changes, ensuring you are always working to the latest standard.
- **Tailored maintenance** to suit your needs:  
Develop bespoke maintenance schedules to suit your needs, amending non statutory tasks as required.
- **Accurate and efficient** tendering and bidding:  
Specify custom maintenance requirements, include timings to support your tendering and bidding process.

**Save time, energy and money.**

# We offer packages to suit your needs:

## CORE PLUS

Access over 1200 schedules covering many equipment types, with on-going legislative updates to ensure you remain compliant. Gain access to service times by schedule and customise maintenance schedules to your requirements.

## SERVICE MODEL

In addition to all the features of Core Plus, Service Model gives you 'at-a-glance' colour coding of tasks that shows the distinction between Statutory/Legal, Mandatory, Optimal and Discretionary tasks.

## SFG20 SOLUTIONS

SFG20 Solutions offers a bespoke service for industry sectors seeking technical support to deliver an effective maintenance regime.

Specifically designed for individual specialist sectors such as retail, health, rail, schools and universities, our team of technical experts will support your business in designing optimal cost-effective maintenance regimes for tendering, auditing and contract management.

## SFG20

Colour coded criticality ratings enable clear prioritisation of tasks to streamline budget and project management

### STATUTORY/LEGAL

To ensure legal compliance

### MANDATORY

Business Critical  
(To ensure sector/  
organisation compliance)

### OPTIMAL

Functional Critical and  
Industry Best Practice
