

AUSTCO HOSPITALS AROUND THE WORLD

Ng Teng Fong General Hospital: Singapore

Ng Teng Fong General Hospital (NTFGH) is part of Singapore's first medical campus to combine continuing care from outpatient to post-acute care. The campus includes the 700-bed Ng Teng Fong General Hospital and the 400-bed Jurong Community Hospital. The 1100-bed development comprises of an outpatient clinic, a community hospital and an acute care general hospital, all designed to provide patient care, treatment and rehabilitation seamlessly between the healthcare buildings. The Emergency Department, Operating Theatres and ICU are located on top of one another and accessible through dedicated trauma lifts to allow for fast delivery of services for critical patients.

Fiona Stanley Hospital: Murdoch, Australia

Fiona Stanley Hospital (FSH) is a state government hospital and teaching facility in Murdoch, Western Australia. Completed in December 2013, the hospital is the largest building project ever undertaken for the Government of Western Australia. The hospital campus includes the main Fiona Stanley Hospital tower with 18 theatres and over 22 wards on nine levels, an education building complete with replica wards and a large tiered lecture theatre, a separate mental health building, the four-story State Rehabilitation Service building and a pathology building. The total floor area is 150,000 square metres (1.6 million square feet). Most of the 640 patient rooms in the hospital are single bed ensuite facilities, with less than 10% accommodating two patients.

Perth Children's Hospital: Nedlands, Australia

Perth Children's Hospital (PCH) has replaced Princess Margaret Hospital (PMH) as Western Australia's specialist pediatric hospital and trauma centre, providing medical care to children and adolescents up to 16 years of age. The hospital is approximately 120,000 square metres and eight stories high with a 298-bed capacity, 12 operating theatres, an integrated research and educational facility and Western Australia's only pediatric trauma centre and research facility.

The Medical City: Pasig City, Philippines

The Medical City (TMC) is a world-class healthcare organization that serves some 50,000 inpatients and 500,000 outpatients a year. The main facility is located on a 1.5 hectare property along Ortigas Avenue in the business district of Pasig City, Metro Manila. It is composed of 115,000 square metres of floor space, and includes two Nursing Towers with capacity of up to 800 beds. TMC also serves as the hub for a network of satellite clinics and hospitals that deliver a range of diagnostic and therapeutic services to patients in Manila and provinces across the country.

SickKids: Toronto, Canada

The Hospital for Sick Children (SickKids), affiliated with the University of Toronto, is Canada's most research-intensive hospital and the largest centre dedicated to improving children's health in the country. The 370-bed hospital is one of the largest and most respected pediatric academic health science centres in the world, known for excellent patient care, and cutting-edge research. As innovators in child health, SickKids helps improve the health of children by integrating care, research and teaching.

Jaypee Medical Centre: New Delhi, India

Jaypee Hospital at Noida is the flagship hospital of the Jaypee Group, which heralds the group's intention to enter the healthcare space. This hospital has been planned and designed as a 1200 bed tertiary care multi-specialty facility and has commissioned 525 beds in the first phase. The Jaypee Hospital was conceptualized with the vision of promoting world-class healthcare amongst the masses by providing quality and affordable medical care with a commitment to improve patient outcomes.

AUSTCO HOSPITALS AROUND THE WORLD

Burwood Hospital: Christ Church, New Zealand

Burwood Hospital is one of New Zealand's centres of excellence for rehabilitation and elective orthopaedic surgery. The new buildings house an impressive 32,500 square metres of purpose-built facilities on three floors and provide a total of 230 new inpatient beds. Included are new ward blocks for medical, rehabilitation and mental health services for older people. There are also new outpatient areas, including radiology and pharmacy areas.

Bahrain Defence Force Military Hospital: West Riffa, Bahrain

The Bahrain Defence Force – Royal Medical Services (BDF-RMS) commenced in 1968 as a small clinic. In 1979 the BDF-RMS grew from a small operation into a 120 bed hospital. The hospital has continuously grown and expanded its services, becoming the second largest hospital in Bahrain with 481 beds to date. While valuing its rich history, the BDF-RMS continuously aims to improve and uphold its commitment to offer the highest quality of healthcare in the most efficient manner.

Mackenzie Vaughan Hospital: Vaughan, Canada

Mackenzie Vaughan Hospital (MVH) is currently under construction with completion scheduled for 2020. The 11-story, 1,200,000-square-foot hospital will consist of inpatient medical-surgical units positioned on top of a diagnostic and treatment podium. There will be 353 beds with capacity to expand to approximately 500 beds in the future. The hospital is designed to optimize patient, family, and staff experience—delivering efficient and high-quality treatment, comprised in a flexible building organization and a technology infrastructure to leverage medical service delivery advancements. MVH will be the first “smart” hospital in Canada with integrated technology allowing medical devices to ‘speak’ to one another, facilitating a more streamlined, patient-focused delivery of healthcare services.

Brampton Civic Hospital: Brampton, Canada

Brampton Civic Hospital (BCH) is a full-service 608-bed community hospital with many specialized services including a critical care response team, cardiac catheterization suite, a Regional Kidney Wellness Centre, a Centre for Complex Diabetes Care and an expansive Mental Health and Addictions program. The hospital has one of the largest labour and delivery programs in Ontario and one of the busiest emergency departments in Canada. Brampton Civic Hospital is one of Canada's first public hospitals to be designed, built, financed, and maintained under a private-public partnership.

Sohar Hospital: Sultanate of Oman

Sohar Hospital is a 408-bed tertiary care hospital built across 33,000 square metres and includes a fully equipped Adult ICU, Paediatric ICU and CCU. The Operative facilities consists of Laparoscopic surgeries, abdominal surgeries as well as arthroscopy and endoscopic sinus surgery. It is a teaching hospital for students of Oman Medical College (second medical college in The Sultanate of Oman). The majority of the hospital's staff comprises of expatriates including doctors and paramedics.

Yishun Community Hospital: Singapore

Yishun Community Hospital is one of Singapore's largest community hospitals to provide rehabilitation services. Situated beside acute-care Khoo Teck Puat Hospital, the two hospitals are connected by sky link bridges and bring about an integrated care experience for patients, through a connected network of healthcare teams, information flow and treatment plans. The 428-bed Yishun Community Hospital provides intermediate care for recuperating patients who do not require the intensive care services of an acute-care hospital.
