

# iSuite Live Video

Real-time audio and video exchange throughout your hospital and around the world.

# Stream intraoperative video **live from the operating room**

## Connect the operating room to the rest of the hospital and **the rest of the world!**

The need for operating room connectivity is more prevalent than ever, and Stryker's iSuite Live Video makes real-time video exchange throughout the hospital seamless and simple.

The iSuite Live Video platform, powered by Cisco, utilizes the hospital's network infrastructure to facilitate video conferencing and broadcasting from within the operating room. This network-based communication eliminates the need for cumbersome cable runs and expands the operating room's video presence to desktop and mobile devices.

Whether broadcasting a surgery for continued education or interacting with Pathology, iSuite Live Video provides an integrated, easy video conferencing solution.

## Empower your surgical team with a single touch of a button using the **Connected OR operating system.**

Stryker's iSuite **powered by the Connected OR operating system** provides control and customization of compatible equipment from a single, intuitive touchscreen.

Our desire is to increase efficiency and satisfaction by simplifying workflows, streamlining communications, and connecting surgeons to their patients and care environment.

### **Hospital communication.** **Centralized. Simplified.**

The real-time messaging feature allows status updates to be sent directly to both physicians and patient family.

### **Video conferencing** **at push of a button.**

Easy to use video conferencing from the same single point of control as used for controlling your other connected medical devices.

### **EHR connectivity.** **Paperless. Secure. Easy.**

iSuite EHR Connectivity provides an integrated, secure, and reliable data management solution to send data to the patient's chart in the EMR or push videos and images to Stryker's media asset management system.

## From the OR, staff can control video exchange through the **Connected OR operating system**.

### Communicate using H.323 or SIP protocol standards

Compatible with your existing video conferencing solution deployed across your hospital enterprise.

### Transmit full HD video

Video-conference in up to 1080p for high clarity presence.

### Leverage the power of Cisco

Leverage Cisco conferencing solutions, such as Cisco Meeting Server and WebEx Teams, to conference from your operating rooms to desktop computers, mobile devices and existing meeting rooms.

### Store your contacts

### in the Connected OR operating system

Easily store your contacts in the address book. For even easier access, you can mark a contact as a favorite.

### Utilize OR privacy

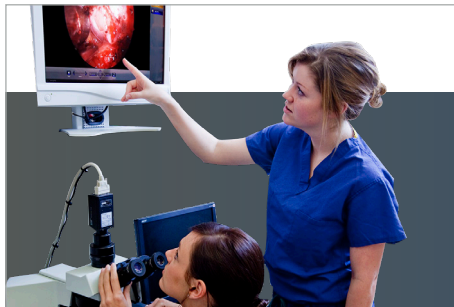

Disable all video connectivity with the OR at any time.

## Real-time

audio and video exchange

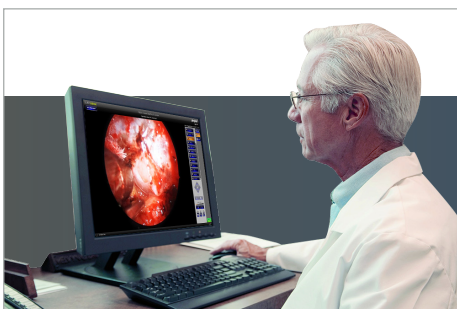

**Communicate** with another operating room for progress updates.

**Interact** with Pathology without leaving the operating room.

**Participate** in discussions with a remote campus.

**Consult** with specialists intra-operatively.

**Broadcast** live surgery to off-site location.

**Educate** students on the latest techniques through live Q&A sessions.

Stryker's **iSuite** offers a combination of equipment and software that transform the traditional operating room into a modern, state-of-the-art surgical environment. We partner with you to understand your unique business needs for you to deliver outstanding patient care.

Design. Equip. Connect. **Partnership**
