**Archive. Edit. Share.**

# How is your surgical team managing **patient videos and images**?

In today's operating room, videos and images captured during a procedure are typically saved to DVDs or USB drives. This method of saving medical information presents several challenges to the hospital.

## **Data security concerns**

- No accountability for the disparate hardware that leaves the OR

## **Hardware accumulation**

- Collections of DVDs make finding desired content inefficient

## **Workflow challenges**

- Accessing images through the EMR, creating a presentation, and sharing surgical videos are all manual, multi-step processes

## **iSuite Media Asset Management** setting the standard in surgical media management

Stryker's iSuite Media Asset Management powered by Studio3 provides a centralized storage solution for the archiving and management of surgical videos / images. The iSuite Media Asset Management software makes it easy for users to archive, edit, and share surgical media from an intuitive browser-based user interface. Whether creating an educational presentation, sharing surgical footage with a patient, or sending a referring physician a link to view a procedure, Stryker's iSuite Media Asset Management increases the utility of stored surgical assets.

# iSuite Media Asset Management Workflow

## 1. Capture

**Stryker Digital Capture device**

Within the operating room, the Stryker Digital Capture device makes capturing HD/4K videos and images simple for surgeons and OR staff.

## 2. Archive

**Storage**

### **Accessibility is key**

iSuite Media Asset Management is a browser-based application that eliminates the need for dedicated workstations. Search, edit, and share content all from the web. Users can access iSuite Media Asset Management from any device with hospital network access—even when they are on the go. Compatible with Windows®, Mac OS®, and iOS® operating systems, iSuite Media Asset Management provides access to surgical content when you need it—where you need it.

## 3. Editing: Video editing made easy

Capture stills

Annotate video

Clip video

Stitch video

## 4. Simplifying workflows

Create PPT presentation

Educate a patient

Share with another physician

Link with a patient's chart via EMR\*

\*Requires iSuite EHR Connectivity powered by DataMedi-

Stryker's **iSuite** offers a combination of equipment and software that transform the traditional operating room into a modern, state-of-the-art surgical environment. We partner with you to understand your unique business needs for you to deliver outstanding patient care.

Design. Equip. Connect. **Partnership**
