

BIM REVIEW

Our BIM Consultants take the BIM journey with you

A Majenta Solutions BIM Review helps organisations analyse and assess current skill levels and identify processes and workflows required to work towards BIM Level 2 Compliance. The analysis process identifies areas which may require development, or improvement as part of your organisations BIM journey.

Our BIM Consultancy services are tailored to your needs. The planning stage will focus on your Business Objectives, Current Processes and Technologies, Team Structures, Standards and Management.

The BIM Review that helps maximise your BIM Investment

This is a brief overview of the topics and areas we will be looking to cover. This will be split into sections, and an agenda agreed in advance in order to cover all aspects of BIM.

The BIM Review will help you:

- ✓ Analyse your current state of BIM readiness.
- ✓ How your company fits in to the BIM Project and Information Delivery Cycles.
- ✓ Outline a structured set of Milestones, Goals and Objectives.

Overview of Topics

- Current Technology Review
- Current Workflow Review
- Review and Discuss Company Goals, Objectives, Road Maps and Strategies
- Interview Key Users & Stakeholders to understand Departmental Goal and Objectives
- Review of Existing Company Standards
- Understand Customer Requirements
- Review and Discuss Existing or Completed Projects
- Current Frameworks and Business Processes Analysis
- Current Skills Analysis
- Current Data Management Strategies
- Required Outputs
- FM Integration Strategy (Owner/Operator)

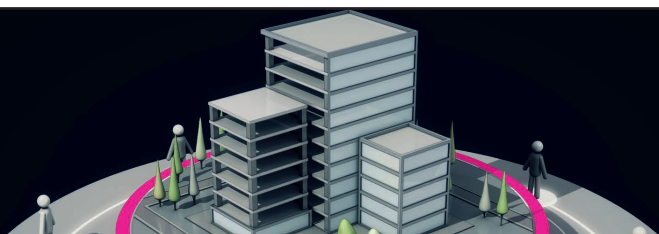

After reviewing these areas, Majenta Solutions will then produce a fully detailed Project Delivery Plan with a Project Schedule aligned to the overall company Objectives and Milestone.

This Project Delivery Plan will be designed to help maximise any investment in BIM while highlighting where return on investment can be realised.
