BUILDING SERVICES

DOWDS GROUP

DOWDS GROUP ARE A LEADING MULTI-DISCIPLINE SPECIALIST CONTRACTOR PROVIDING CONSTRUCTION, BUILDING SERVICES, FACILITIES MANAGEMENT AND ENERGY SOLUTIONS.

We are focused on providing clients across the UK & Ireland with high quality, innovative solutions. We exceed customers' expectations as evidenced by our levels of repeat business and our involvement in cutting-edge healthcare, education, leisure, commercial and residential projects throughout the UK and Ireland.

WHY ARE DOWDS DIFFERENT?

- We are an owner managed company – we make our own decisions.
- We stay at the forefront of delivering complex building services and construction solutions.
- The quality of people and our product, and the surety of delivery.
- Our long-term strategy is to partner with clients who understand the benefit we bring.

WHAT CAN WE DO FOR YOU?

We do things *The Dowds Way* - our clients can expect a seamless service through early engagement with our experienced in-house Design and BIM team, our highly commended one stop shop service and working with a contractor who cares, identifying and resolving any issues before starting on site.

GROUP

BUILDING SERVICES

AWARD WINNING AND INDUSTRY LEADING QUALITY DELIVERY OF CHALLENGING MECHANICAL & ELECTRICAL BUILDING SERVICES.

Our industry leading approach to M&E can transform the most complex projects into a straightforward, innovative solution. We have built a solid reputation of delivering quality installations to our clients through precise consultation and consideration of the project. Our extensive experience spans across Education, Commercial, Arts/Leisure and Healthcare, throughout various regions in the UK and Ireland.

DESIGN

As part of a contractor led team, we provide full MEP design services developing early design intent to fully coordinated detailed design ready for installation. Our approach is centred on retaining qualified building services engineers, design technicians and design managers to ensure full technical and commercial confidence through each stage of the process. Our experienced in-house design managers are fully involved in each stage of the project lifecycle to ensure the highest technical quality through to/up to completion and commissioning.

DESIGN FOR MANUFACTURE AND ASSEMBLY (DFMA)

Innovation and adoption of Modern Methods of Construction is a key focus for the company. We are early adopters of containerised plant rooms, prefabricated service risers and switch room solutions. Development in building services integration to meet new post Covid 19 site restrictions, potential skills shortages due to Brexit and a changing market are a challenge we are facing every day.

INSTALLATION

We pride ourselves on employing and retaining the best management and engineers to install the latest technology in the safest and optimum way. Supported by our specialist supply chain, our specialist teams provide a comprehensive range of M&E services.

BIM

INNOVATION IN DESIGN – LEADING THE WAY IN COMPLEX AND CHALLENGING PROJECTS.

Dowds Group are at the forefront of digital design, offering the most advanced expertise in Building Information Modelling. With a blend of Chartered MEP Engineers and graduates, our in-house team has the capabilities to deliver complex design and build projects across Healthcare, Education and Leisure.

BIM LEVEL 2

As a BSI BIM Verified ISO 19650 contractor, we have developed a structured set of standards, procedures & protocols. We utilise multiple software solutions to ensure compliance to the client's BIM Execution Plans (BEP) for graphical and non-graphical data exchange.

BIM is a central part of our digital design service and uses an integrated 3D model throughout the design and construction life cycle of a project. Dowds utilise Autodesk Revit MEP software to design, coordinate, schedule and fabricate. Autodesk Navisworks Manage is also utilised for clash detection, flythrough and animated presentation visualisations.

CLIENT COLLABORATION

Early integration of the client, design and build teams is essential for successful implementation of BIM. We work alongside our clients to develop a list of information that must be integrated into the Building Information Model which allowing you to experience the building early in the design process. Client collaboration resolves any design issues before construction and results in reduced time, cost and risk in all phases of the project.

THE OLD GRAMOPHONE WORKS

HEALTHCARE EXPERIENCE

HEALTHCARE EXPERTISE

With over £100M of M&E work completed in the acute healthcare sector in the last 10 years, our wealth of specialist experience working in hospital environments, has allowed us to improve the level of critical care facilities for patients throughout the UK. Due to the complexity and heavily serviced nature of these projects, our BIM Department are a vital part of the team from the early coordination phase through to installation.

- Understanding of the HTM and HBM standards
- Proven track record of delivery highly technical schemes for both NHS and private clients
- Early involvement gives our clients clarity of scope & cost certainty.
- We understand & utilise the PCSA process
- An open book approach to our bids.
- We ensure seamless integration from Design through to construction and aftercare.

PROTON BEAM THERAPY RUTHERDFORD CANCER CENTRE

OVERVIEW

The cancer centre is located within the Thames Valley Science Park, which is part of the University of Reading, this facility will be the third of its kind built in the UK by Proton Partners International.

Amongst other conventional cancer therapies, this centre will offer proton beam therapy which is a specialised type of cancer treatment not available yet in the UK. The centre will include facilities for proton beam therapy, a linear accelerator, as well as a CT suite and an MRI. It is expected that the centre will be able to treat up to 500 patients a year and will also offer imaging, chemotherapy and traditional radiotherapy.

QUEEN ELIZABETH HOSPITAL

OVERVIEW

The Queen Elizabeth Hospital which was built in the 1950s and later modernised in the 1990s under a PFI agreement is in urgent need of refurbishment and modernisation to bring the building up to modern standards.

Work has already started for Dowds to accurately design and agree cost on every aspect of the project prior to contractors going into the hospital at beginning of 2022, with the contract expected to be finished the following year.

Dowds will be working closely with the NHS Trust to ensure minimum disruption to staff and patients throughout the refurbishment and will be responsible for upgrading all of the electrical infrastructure. We will further upgrade the facilities for medical gas supplies such as oxygen, the climate control and all the other M&E areas across the site.

CLOCK VIEW HOSPITAL

OVERVIEW

The new modern, mental health inpatient facilities has 85 ensuite bedrooms. It provides short-stay treatment for local people with a range of mental health issues including depression, anxiety and dementia. Clock View also has a new psychiatric intensive care unit (Newton Ward) for those in the most distress in need of inpatient care.

The hospital is the base for a new local assessment and immediate care service that provides emergency, urgent and routine assessment, enabling better support for people between inpatient and community services. The building is operated as a 24hrs a day, 365 days a year operation and therefore the M&E services were designed to facilitate the ongoing operation and maintenance of these systems.

ALTNAGELVIN HOSPITAL, NORTH WING

OVERVIEW

Dowds completed work on the new main entrance block and North Wing accommodation for Altnagelvin Acute Hospital. Due to the Covid 19 pandemic, three of the new inpatient wards were 'fast tracked' ahead of schedule to manage the COVID-19 'surge' capacity at the hospital and provide additional hospital bed space.

The ward block accommodation comprises 6 new departments with a total of 144 adult single-bed rooms, isolation wards, a renal dialysis suite, basement plantrooms and service tunnels. The new main entrance block now acts as the main entrance to Altnagelvin Acute Hospital. This is connected to the North Ward wing, the existing tower block and the rest of the hospital by a new hospital street.
