

## Ireland's only holistic provider of decontamination solutions

**Customised support** from 24/7/365 emergency support to routine service programs

**Capital equipment** from leading manufacturers adapted to the healthcare industries

**Innovative consumables** with quick turnaround thanks to our extensive inventory in Dublin

Over 50 years in operation

Nationwide footprint

# More than an equipment supplier we offer a large range of services

## Maintenance & Technical support

We install, monitor, maintain and repair your equipment. We also train your team and provide equipment rental services. Our team provide you with an abundance of collective knowledge built from over 200 years of industry experience.

## Calibration & Validation

We are fully accredited to calibrate and validate any decontamination equipment. In line with our ISO certifications we provide detailed reporting with a quick turnaround. A draft report is also available immediately on request.

## Managed Equipment Service Contract

A smart financial plan to include your capital equipment, your consumables and all maintenance, support and validation needs. Backed by a comprehensive service cover, giving you a clear budget forecast for your department.

## Turnkey Engineering Solutions

From design, construction, electrical and mechanical work, through to stainless steel finishing and staff training. We handle the entire process thanks to our large portfolio of trusted contractors in Ireland and Northern Ireland.
