

# Safety Action Notice

Reference: SAN2301

Issued: 04 January 2023

Review Date: 01 January 2024

## National adverse incident reporting and safety alert systems for medical devices, IVDs, estates, facilities, social care equipment and PPE

### Summary

Councils and health boards must have local systems in place for managing adverse events and safety alerts. These systems should integrate with national incident and alert systems operated by NHS National Services Scotland's Incident Reporting & Investigation Centre (IRIC).

### Action

1. Annually review local systems for:
  - identifying, recording and reviewing adverse events
  - ensuring incidents are reported to IRIC ([report an incident](#))
  - identifying trends and sharing learning from adverse events
  - managing safety alerts
2. Ensure that an *Incidents and alerts Safety Officer (ISO)*<sup>1</sup> is appointed, supported and enabled to function at corporate level with suitable arrangements for continuity of cover.
3. NHS Boards - ensure the ISO has ready access to:
  - executive lead for management of serious adverse events
  - quality improvement lead
  - procurement lead
  - medical devices committee and/or head of medical physics

#### Action by

- Chief Executives
- Directors of Estates & Facilities
- Incidents and alerts Safety Officers
- Health & Safety Managers
- Medical Directors
- Nurse Directors
- Responsible Directors (SHTN 00-04)
- Risk Managers

### Background

Councils and health boards have a duty to ensure care services are delivered safely. Learning from adverse events and managing safety alerts are fundamental to the safe delivery of care services. NHS National Services Scotland's Incident Reporting and Investigation centre (IRIC) is a specialist safety and risk management unit with responsibility for:

- medical devices
- in-vitro diagnostic medical devices (IVDs)
- estates & facilities
- social care equipment and
- personal protective equipment (PPE)

<sup>1</sup> *Incidents and alerts Safety Officer (ISO)* role was previously known as *Equipment Co-ordinator (EC)* prior to 2021

IRIC has a specific remit from Scottish Government<sup>1</sup> to operate national adverse incident reporting and safety alert systems. These systems cover all services provided by local authorities, health boards, partnership organisations and contractors. National guidance<sup>2</sup> has been issued on the arrangements which local authorities and health boards should have in place.

IRIC services are integral to the framework for learning from adverse events<sup>3</sup> published by Healthcare Improvement Scotland (HIS). The framework requires that health boards manage all adverse events through reporting, review and improvement planning. It is supported by the Adverse Events Community of Practice [website](#) which contains policies, tools, templates, learning summaries and other items which boards are able to share.

The arrangements outlined in this notice do not apply to patients, service users and members of the public. Patients and service users who have been provided with equipment should notify incidents to the health or care professional responsible for managing their care. Once notified, these incidents should be recorded on local systems (normally referred to as Datix or Ulyses) and subsequently reported to IRIC. Members of the public who have used their own private funds to purchase equipment, for example from high street pharmacies, should report incidents to MHRA using the [Yellow Card](#) scheme.

NSS has a partnership arrangement through which it shares information on adverse events with the MHRA which regulates medical devices. NSS also works closely with Scottish Government, Healthcare Improvement Scotland, NHS Improvement and counterparts in devolved governments in Wales and Northern Ireland.
