

LEGIONELLA MANAGEMENT FOR WATER SYSTEMS REMOTE

CITY & GUILDS ACCREDITED (EWH001)

Course Overview:

Our Legionella Management course has been developed in response to industry demands for knowledgeable and suitably trained management staff that understand Legionella and water management control. Taught exclusively by industry professionals, this course will give you the necessary information for you to understand and fulfil the duties and responsibilities of the Duty Holder and Appointed Competent person.

Throughout the day you will cover: supervision, effective implementation and management of risk assessments, along with remedial work and management of water systems to ensure your facility complies with Approved Code of Practice L8 (ACoP L8). We appreciate that our training staff are a vital component of the overall delegate learning experience. As such, all of our remote training courses are delivered live by one of our tutors through Microsoft Teams, or alternatively, Zoom.

Who Is This Course For:

This legionella training course is suitable for those within or working towards the management role or anyone that oversees the day to day operation of a water system, such as Duty Holders and Competent/Responsible Persons.

This course satisfied the HSE's ACOP L8 and relevant legislation and is suitable for: landlords, business owners, health and safety managers, property and facilities specialists.

Key Learning Areas Covered in This Course:

- Legionellosis – background – medical aspects
- Legal implications
- ACOP and guidance on the control of legionella in water systems
- Implementation of the written scheme
- Water sampling and necessary actions
- Ensuring competency of staff, consultants and contractors
- Water systems disinfection requirements
- Management of log book records
