

Medical Gases Training

## Quality controller MGPS introduction

Eastwood Park delivers **MGPS** training to support a number of roles, with a mix of both theory and practical learning.

### Is this course for you?

This course is aimed at staff who intend to become quality controllers in a medical gas permit to work system. It is also suitable for any pharmacist, chemist, engineer or technician with a need for medical gas and vacuum systems knowledge.

### Course aim

Learners will develop an understanding of the role of a quality controller and the duties required.

### Objectives

- Identify hazards of Medical gases and the necessary precautions and Demonstrate how to work safely with medical gas pipeline systems
- Identify and understand the components which make up a medical gas system to HTM 02-01
- Explain the role of the Quality Controller as stated in HTM 02
- Complete permit to work forms and state the role of the QC in the PTW process
- Carry out safely the testing duties of a quality controller as described in HTM 02
- Identify possible hazardous situations and apply (or recommend) appropriate remedial action
- Recognise design and installation practices as per HTM 02
