

Medical Gases Training Porter MGPS (HTM 02)

Eastwood Park delivers **MGPS** training to support a number of roles, with a mix of both theory and practical learning.

Is this course for you?

This course is aimed at hospital porters who handle medical gas cylinders.

Course aim

The course provides learners with the knowledge and skills required by the HSE and HTM 02-01 to use medical gases safely and correctly.

Objectives

- Identify medical gases, associated hazards and the necessary precautions
- Identify different types of medical gases and their uses
- Carry out safe handling of cylinders
- Correctly and safely use medical gas cylinders including changing cylinders on manifolds
- Define the requirements of the permit to work system
- Define what to do in an emergency situation and the correct response to alarms

At your site

Training can be provided at your site for up to 8 learners per 3-hour session. Two sessions can be carried out per day. A suitable training room and access to the manifold room is required.

Additional information

HTM 02-01 recommends that Designated Porters carry our refresher training every year.

50+ years of world-class training
