

Medical Gases Training

Competent person MGPS (HTM 02) first responder

Eastwood Park delivers **Competent person MGPS** training to support a number of roles, with a mix of both theory and practical learning.

Is this course for you?

This course is for estates staff who are involved with medical gases and may have to respond to a medical gas related issue.

Course aim

The course will provide the learner with the knowledge and competencies required by the HSE and HTM 02-01 to work on a restricted range of medical gas plant equipment safely and correctly.

Objectives

- Identify medical gases, associated hazards and the necessary precautions
- Identify different types of medical gases and their uses
- Correctly and safely use medical gas cylinders including changing cylinders on manifolds
- Correctly and safely carry out medical gas hose replacements
- Carry out compressor maintenance and daily and weekly medical gas plant checks competently
- Explain the requirements of the permit to work system, and the quality checks as required
- Define what to do in an emergency situation and the correct response to alarms
- Repair / replace terminal unit 2nd fix components

At your site

Training can be provided at your site for up to 8 delegates. A suitable training room and access to manifold and medical gas plant rooms is required.
