

Medical Gases Training Competent person MGPS (HTM 02) refresher (maintenance)

Eastwood Park delivers **Competent person MGPS refresher** training to support a number of roles, with a mix of both theory and practical learning.

Is this course for you?

This course is for learners who have previously attended medical gas pipeline systems training for Competent Persons and who now require updating on current guidance and best practice

Course aim

This course updates the practising Competent Person's knowledge of current guidance relating to **medical gas** pipeline systems.

How often should I complete this refresher training?

HTM 02-01 recommends that refresher training is undertaken every three years.

Objectives

- Identify potential hazards and adopt safe working procedures when working on piped medical gas systems
- Identify relevant medical gas cylinder colour codes
- Correctly use medical gas cylinders including cylinders on manifolds
- Correctly set up plant and manifolds per HTM guidelines
- Carryout operational checks on pipeline systems as required to fulfil a role
- Correctly service a range of medical gas terminal units
- Correctly calibrate pressure switches and set up alarm systems
- Provide competent assistance to the Authorised Person during the execution of engineering tests
- List the duties of a Competent Person in accordance with HTM 02
- Summarise the medical gas pipeline systems 'Permit to Work' scheme

50+ years of world-class training
