

Medical Gases Training

Medical gas hose making

Eastwood Park delivers **Medical Gas** training to support a number of roles, with a mix of both theory and practical learning.

Is this course for you?

This course is for staff employed in EBME departments with responsibility for manufacturing medical gas hoses on-site.

It is also suited to healthcare personnel who also inspect, test and replace medical gas hoses.

Course aim

This course focuses on the manufacture and testing of medical gas hoses in line with ISO 5359:2014 and will increase the learner's knowledge of medical gas hoses and their safe manufacture and use. The course covers how to identify and use manufacturing equipment and gas specific connectors, as well as learning the correct methods of labelling to the ISO standards.

Objectives

- Identify hazards of medical gases and the necessary precautions
- Identify and select the components which make up a medical gas hose
- Carry out hose manufacturing process
- Carry out tests on a hose
- Clarify the requirements of hose maintenance and checking when in use

At your site

If the training is being delivered at your site the following is required:

- An area or room where information can be projected onto a screen or wall
- Seating with tables or desks for trainee's
- An area where learners can practise hose making and testing

***Please be aware that this course is highly practical and suitable clothing should be worn.**
