

## Lift Safety Training Release of trapped passengers refresher (HTM 08-02)

Eastwood Park delivers **lift** training for the healthcare & commercial sectors in our specialist facility with access to our 3-storey **lift maintenance** tower for practical, fault-finding exercises without the worry of time pressure or disruption to business.

### Is this course for you?

This course for lift release wardens who require a refresh and have completed a full release of trapped passenger training course around 12 months ago. You may be asked to provide proof of this when booking. Please note the full course must be completed every 3 years.

### Course aim

To provide learners with an update on the skills and knowledge required to carry out the release of trapped passengers from lift installations in a safe and responsible manner.

The course follows the basic principles for the manual release of trapped passengers that applies to all electric traction (including MRLs) and hydraulic lift installations with the power isolated.

It is based around current legislation including British Standards 5655 and 7255, BSEN81 parts 1, 2 and 3 and HTM 08-02.

### Objectives

- State the relevant current standards and legislation concerning lifts.
- State the electrical and mechanical safety features, aspects and safe working procedures with respect to; electrical equipment; electrical equipment; rotating machinery; safety of personnel and releasing passengers from electric and hydraulic lifts
- Carry out a risk assessment in the lift motor room and at landings.
- Correctly release passengers from a lift safely, confidently, and with the minimum amount of disruption.
- Determine when the escalation procedure should be applied.

### Additional information

This course is normally run at a customer's premises.

It is largely practical, with some classroom and assessment work. Due to the practical nature of the course, learners should bring a pair of overalls.

50+ years of world-class training
