

Lift Safety Training

Safe working on lifts & release of trapped passengers

Eastwood Park delivers **lift** training for the healthcare & commercial sectors in our specialist facility with access to our 3-storey **lift maintenance** tower for practical, fault-finding exercises without the worry of time pressure or disruption to business.

Is this course for you?

This course is for those new to working on lift installations. It provides a broad range of competences essential to work safely in a lift environment.

Course aim

To provide learners with the skills and knowledge to carry out the release of passengers in a safe and responsible manner.

Objectives

- List relevant current standards and legislation concerning lifts
- Identify and control hazards encountered in lift installation, including fire
- Apply safe working practices and procedures in a lift environment
- Describe key accident and emergency procedures
- State electrical and mechanical safety features, aspects and safe working procedures with respect to:
 - Electrical equipment
 - Rotating machinery
 - Safety of personnel
 - Releasing passengers from electric and hydraulic lifts
- Carry out a risk assessment in the lift motor room and at landings.
- Correctly release passengers from a lift safely, confidently, and with the minimum amount of disruption
- Identify when the escalation procedure should be applied

Additional information

Due to the practical nature of the course, learners should bring a pair of overalls.
