## Mortuary Chambers

Our vast experience of more than 40 years in the supply of coldrooms includes the design, construction and installation of body mortuary chambers.

Williams Mortuary Chambers help to prevent the growth and spreading of pathogens and bacteria. They provide precise temperature control and offer a robust stainless steel storage solution, while being easy to clean and maintain.

We offer a variety of options including fridge and freezer combination chambers as well as sizes to accommodate different body sizes.

When accessing the chambers, options include hinged or side loading doors, while the finish can either be stainless steel or white PVC coating.

Additionally we can provide all accessories including full width body racks, stainless steel body trays and hydraulic body stackers.

Our mortuary and chilled body storage chambers are designed to suit different environments and applications including hospitals, health care facilities, undertakers and military settings.

### Installations include:

Cross House Hospital, Ayr  
Prince and Princess of Wales, Glasgow  
Western Hospital, Edinburgh  
Western Isles hospital  
Barra Hospital, Benbecule Island
