One transportation trolley, a thousand possibilities – the modular MPO system.

In the healthcare sector, nursing trolleys, dressing trolleys and medication trolleys have to fulfil a wide range of requirements. ZARGES modular nursing and organisation

trolleys can be perfectly tailored for any applications based on your specific requirements.

1 Worktop options. ABS plastic with or without raised edges, or flat HPL plastic. **2 Ergonomic handle.** Plastic-coated cast aluminium for comfortable handling, easy to clean. **3 Side wall.** Available with coloured centre segment. **4 Bumpers.** Abrasion- and disinfectant-resistant plastic padding. **5 Castors.** 4 precision twin-wheel swivel castors, Ø 125 mm, for maximum mobility in confined spaces, 2 of which with brakes; bumper available as an option. **6 Corner profiles.** Made of anodised aluminium. **7 Trolley base.** Made of sturdy plastic panel. **8 Drawer handle.** Plastic-coated cast aluminium for convenient handling, easy to clean with optional colour coding.

Drawers

Suitable for ZARGES ISO modules, mounted on telescopic rails.

Rolling tambour doors with support wall

Suitable for ZARGES ISO modules and modular drawers, mounted on the plastic support wall, space-saving door option.

Rolling tambour doors with variable telescopic rails

Suitable for ZARGES ISO modules and modular drawers, mounted on telescopic soft-close rails.

Open, with modular drawers

Mounted on telescopic rails and removable.

Configure the perfect trolley for your needs – the available options.

In addition to a wide range of tried-and-tested standard models, all nursing and organisation trolleys can be configured to suit your everyday needs. The options include everything from the choice between drawer fronts and rolling tambour doors right through to support systems for slide-in units.

The support systems can be adapted to your specific requirements, and the worktops are available with various combinations of material and functions. We will be happy to help you find the right solution.

Well stocked in every situation: MPO storage trolleys.

It is important to ensure you have the right amount of the required supplies in the right place and at the right time. The MPO storage trolley is able to help you achieve just that. It meets hygiene requirements and is easy to clean because

its rolling tambour doors and all its fittings can be removed individually and without the use of tools. The materials used (aluminium, plastic and ABS) guarantee sturdiness and a long service life.

A detailed look at the MPO supply trolley.

1 Corner profiles. Ergonomically shaped, anodised aluminium profile sections. **2 Front panel.** Anodised aluminium, can be fitted without tools, can be supplied with cylinder, combination or card lock. **3 Interior fittings.** Modular drawers, modular baskets and shelf compartments can be installed as required on plastic support walls and telescopic rails. **4 Trolley base.** Made from sturdy PPH plastic panel without undercut, easy to clean. **5 Side walls and rear wall.** Made of plastic-coated aluminium, white, available in other colours. **6 Chassis.** 4 twin-wheel swivel castors with $\varnothing 125$ mm, 2 of which with wheel brakes. **7 Rolling tambour door.** Space-saving plastic rolling tambour door that can be removed for cleaning without the use of tools.

Modular support elements provide maximum flexibility.

MPO storage trolley – standard model

- ▶ Plastic support walls throughout.
- ▶ Suitable for ZARGES ISO modules and modular drawers.

MPO storage trolley – combination model

- ▶ Can be combined with plastic support wall and hook-on telescopic rails.
- ▶ Suitable for ZARGES ISO modules, modular drawers and pull-out shelf compartment.

Door options.

Rolling tambour door

- ▶ Rolling tambour door helps save space.
- ▶ Can be removed for cleaning without the use of tools.

Glass door

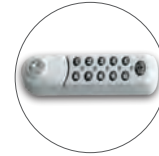

- ▶ keeps items in sight and readily accessible.
- ▶ Door frame made of sturdy aluminium profiles.
- ▶ Tempered safety glass compliant with DIN EN 12150 for high resistance to shock and impact.

MPO with glass door. Keeps items in sight and readily accessible.

Stability

Thanks to the all-round aluminium frame.

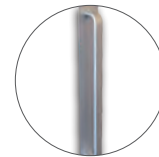

Secure storage

With optional lock systems.

Sturdy and functional

Due to flat hinges that are adjustable in three directions.

Comfort

Due to ergonomic handle made of anodised aluminium. Door opens up to approx. 170 degrees.

Items are kept perfectly in sight

Thanks to tempered safety glass.

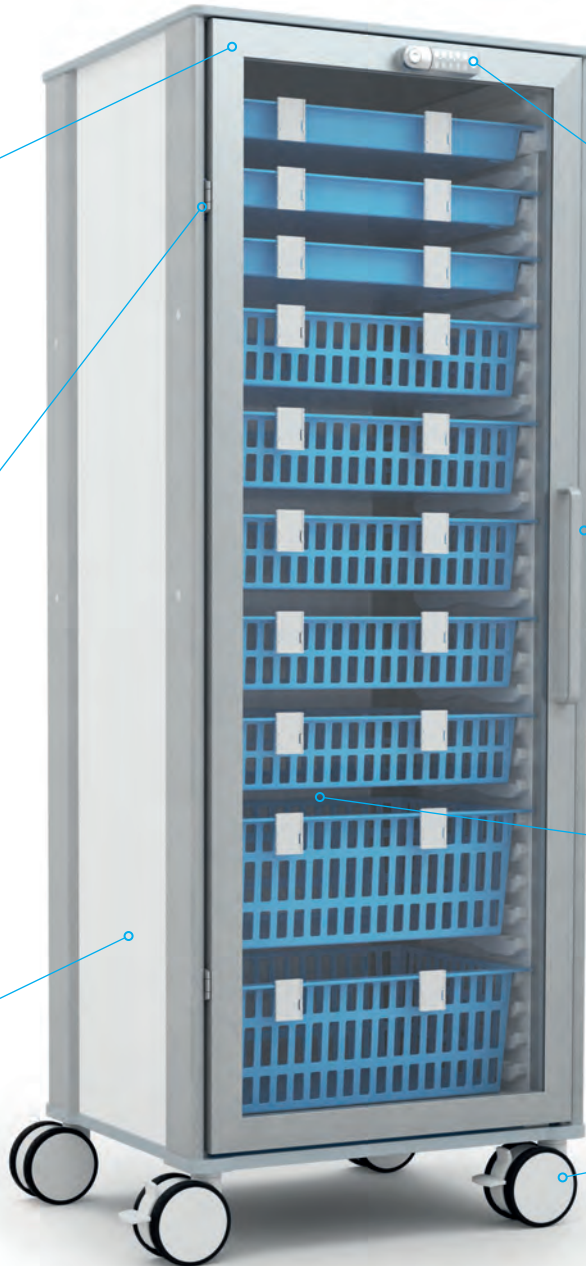

Mobile storage

- Modular support walls provide maximum flexibility.
- The colours of the side and rear walls are customisable.

Optimum mobility

Due to four plastic twin-wheel castors, two of which equipped with brakes; corner bumpers available as an option.

- ▶ Door frame made of sturdy aluminium profiles.
- ▶ Tempered safety glass compliant with DIN EN 12150 for high resistance to shock and impact.
- ▶ Door opens up to approx. 170 degrees.
- ▶ Door is fitted with versatile flat hinges that allow it to be adjusted in three directions.

Configurable trolley interior

- ▶ ABS support walls with or without tilting function.
- ▶ Telescopic rails that can be fitted as required.
- ▶ Telescopic rails for fixed installation.

And most crucially: it's a tried-and-tested solution.

Vertical trolley handle

Bumper

Locking systems can be fitted with a cylinder, digital or card lock.

Digital locking systems – impeccable security for any requirement.

Our solution to meet your needs.

- Our digital locking systems are open solutions. This means existing systems and key cards can be integrated without any issues.
- Effortless installation and commissioning.
- All essential information and access rights are stored on a key card.
- Scalable according to needs and organisation size – from simple solutions that operate without software to software-enabled full solutions.
- Activity logging can be enabled.
- Existing locking systems and key cards can continue to be used.

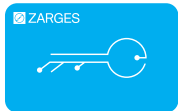

Many systems, one solution.

Packages

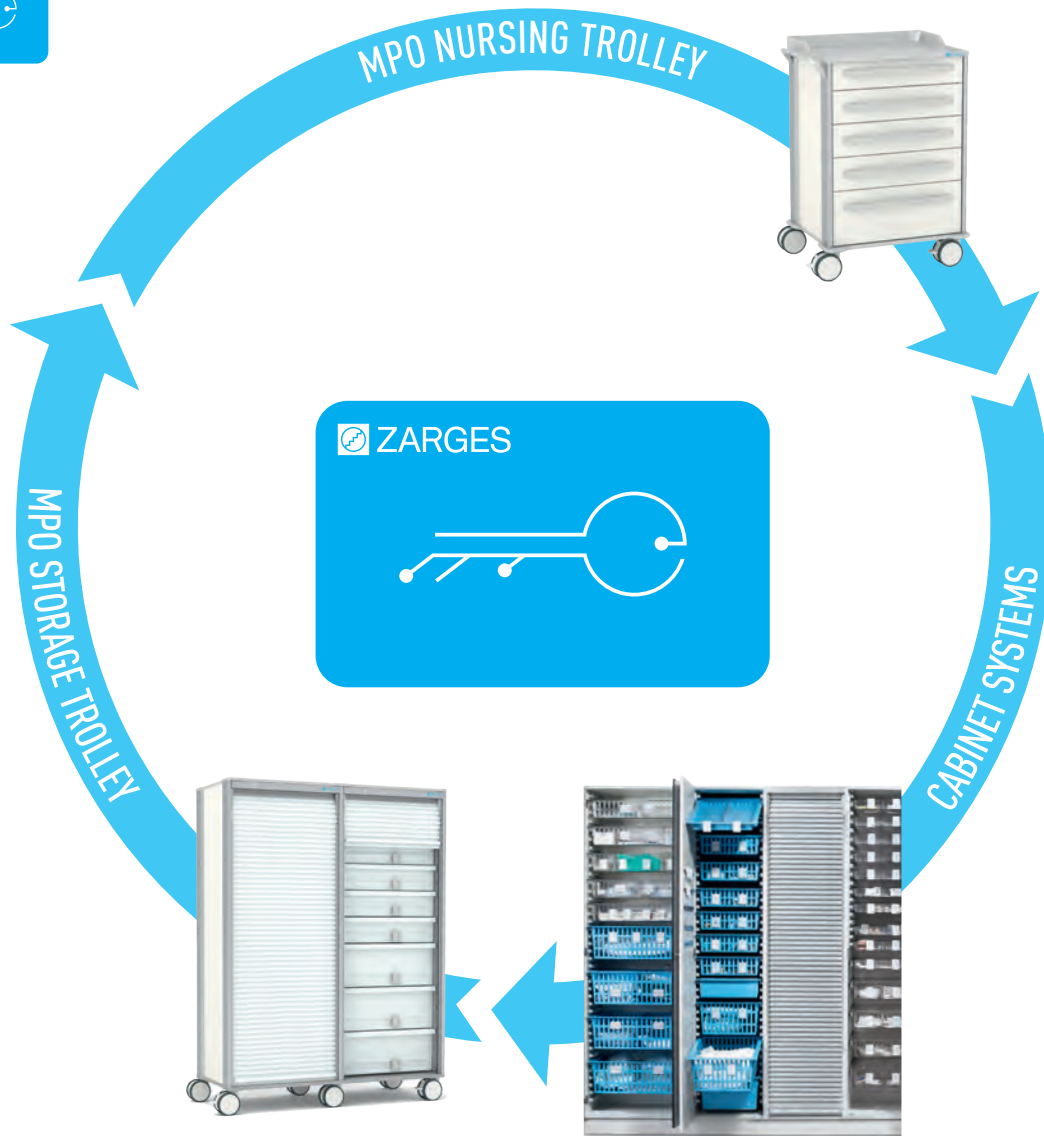

Package 1 "Standalone solution"

The lock can be programmed using a master card without any software – this solution is suitable for small buildings. Any changes to the locking system (for example, in the event of the loss of a key card) must be made directly on the lock itself. The system can be retrofitted with programming capability and software at any time.

Package 2 "Island solution"

The solution for greater overview: A smart software application is used to allow programming to be done using a laptop. Data is transferred using a wireless communication device or an update terminal. The locks are not integrated into the overall access control.

Package 3 "All-in-one solution"

The comprehensive solution: A terminal is used to ensure individual staff members always have up-to-date access rights; this should ideally be combined with access control or time tracking. Data is stored on a key card and transmitted to the terminal at the end of a workday. This allows you to retrace who has used which cabinet.

ZARGES –

Access. Packaging,
transportation.
Special
construction.

For more than 85 years, the brand name ZARGES has been synonymous with premium quality and continuous innovation. As an innovation leader, we are constantly improving our range and creating solutions and products that are consistently tailored to your needs. And good ideas always come from closely working together with you, the customer.

Our aim is to always provide you, the professional, with the right solution for any requirement. For your safety and efficiency.
