

Authorised Person Lifts Refresher HTM 08-02

📍 York, Slough, Livingston and On-site | 3 Day | [View Latest Price & Availability](#)

Course Overview:

This refresher course is based around current legislation around the management of Lifts, including the Lift Regulations 2016, PUWER, LOLER, British Standards, SAFED guidance notes, HTM 08-02 and other relevant current legislation such as European and British Standards. This 3-day course is theory based within PPL Training Centre and covers the requirements to manage the servicing maintenance and inspection requirements of all lifts generically.

Who Is This Course For:

Personnel already appointed as Authorised Person Lifts, to manage their lifts in the healthcare environment with a renewed understanding of current legislation, regulations, roles and responsibilities and who should undertake these. In addition, the course reminds the delegates of the inspections and examinations required for lifts, as well as the safety examinations required of electrical and mechanical items.

Key Learning Areas:

- Understand typical lift installations within healthcare, basic design considerations, maintenance & thorough examination requirements
- Understand typical issues experienced to lift equipment and how to prevent basic problems occurring
- Apply safe working methodology within a lift environment to the required legislation and guidance
- Regulations to consider LOLER, PUWER, Manual Handling Regulations
- Introduction to the documentation required to meet the legal and regulatory obligations applicable to lift installations
- Effective contract management of Lift Engineering provider and ensuring the requirements of effective Trust are met
- Management of the typical safety hazards experienced within the lift environment, in accordance with current regulations
- Detail the Professional roles and responsibilities of the respective safety management structure, in accordance with HTM 08-02
- Define Lift owners or duty holders responsibility's (i.e. that applies to all)
- Define the term Competent Person, in accordance with LOLER, and what is expected in relation to servicing, inspecting and written schemes of examination
- Define SAFED and the supplementary testing requirements

📍 York Campus

Our head office is conveniently based at York Business Park on the outskirts of York city centre. This well-established training centre accommodates a number of practical assessment areas for a highly interactive and participative training experience, alongside large comfortable classrooms with amenities such as complimentary WiFi, and refreshments.

📍 Slough Campus

Our Slough centres are ideally situated on the Slough Trading Estate, with central London and Heathrow both less than 20 minutes away. The Malton Avenue centre covers 15,000 square feet and boasts over 7,000 square feet of practical assessment training space. As with our York centre, we provide large comfortable classrooms with amenities such as complimentary WiFi and refreshments.

📍 Livingston Campus

5 Deer Park Avenue, part of the Fairways Business Park was established as our Scottish training centre in 2022. This easily accessible centre (just off the M8) services our connections north of the border, as well as those in the north of England. It houses 4 newly refurbished classrooms, as well as practical training facilities for F-Gas handling, Low Voltage and Mechanical and Pressure Systems

On-Site and Remote Training Options

We recognise some of the commercial restraints which surround sending multiple members of a team on to training courses. There are also the financial implications of accommodation, travel and time away from site.

Some of the key benefits of on-site training include; Reduced down time, Dates to suit your team and Cost effective team training

Some of the key benefits of remote training include; Live tutor-led courses, Cost effective delivery and Reduced down time

The Importance of Practical Training

Our practical facilities showcase industry standard installations, enabling delegates to gain hands-on experience in a variety of settings, designed to mimic those found across the healthcare estate.

By attending either of our AP or CP courses, you will gain transferable skills and knowledge to be able to carry out your duties in-line with HTM Guidance and enable you to react effectively to emergency situations, should they arise.
