ABOUT US

BOILING

CHILLED

SPARKLING

HOT & COLD

Quatreau® tap systems and HydreauBar™, bottling solution are innovations designed and developed by Roger Wiltshire, a pioneer in the water industry.

In 2009 Roger designed the world's first multi-function tap. The concept started out as a stand-alone tap delivering boiling, chilled, and sparkling purified water but, the concept developed to encompass an unfiltered supply of mains hot and cold water turning the design into a tap that delivered 5 types of water. Other configurations available include 2 or 3 function taps with or without drip trays. The HydreauBar is the system that provides bottling solutions for the hospitality industry and work environment.

PARTNERSHIP

Global Water Solutions is the global strategic partner and distributor for Quatreau® Systems world-wide. Global Water Solutions has a strong commitment to customer service and is at the heart of the GWS offering. Its team of highly experienced technical sales and engineering staff deliver exceptional after sales service and field support for customers. GWS offers other products that provide further purification of your water.

YOUR QUATREAU®

Multifunction Smart Taps - Boiling, Chilled, Sparkling, Hot & Cold - In an instant

FOR YOUR HOME

Experience the convenience of instant boiling, chilled and sparkling water at the touch of a button in your beautifully designed kitchen.

FOR YOUR YACHT

Get instant boiling water for your morning tea while sailing. Or add a splash of sparkling water to your evening cocktail while watching the sunset on your yacht's deck.

Made in the UK

FOR WORK

Quatreau systems replace the office water cooler. Enhance your office by adding an all-in-one station.

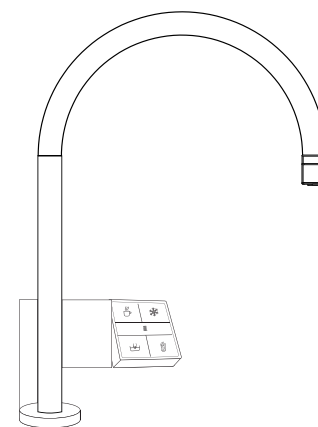

FOR HOSPITALITY

Upgrade your restaurant or café kitchen by adding a multi-function tap. Offer water to your gym membership without the added expense of bottled water.

YOUR QUATREAU®

QUATREAU TOUCHTAP™

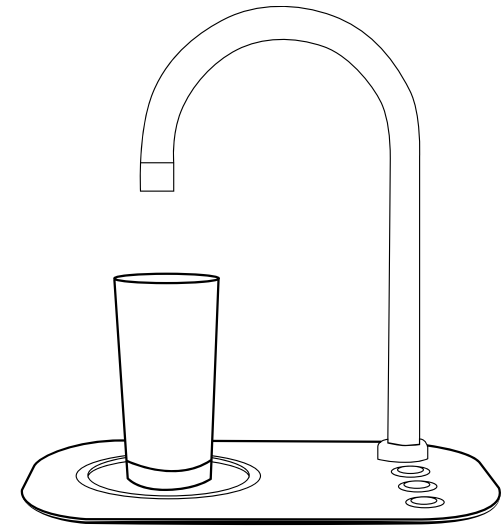

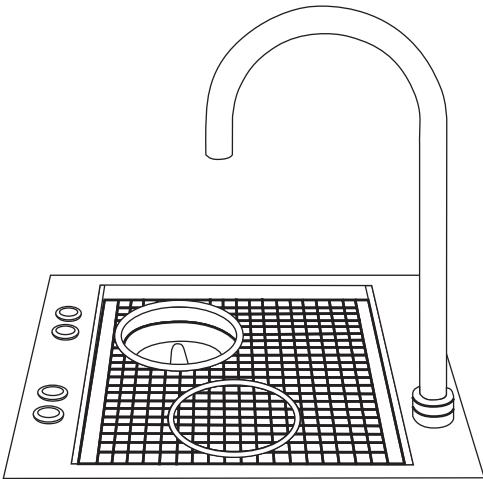

Convenient and amazingly useful, its unparalleled function and design is the conversation piece of your kitchen.

Named by Better Homes and Gardens "30 Most Innovative Products of 2017", the Quatreau TouchTap is the first tap that delivers the purest instant boiling, instant chilled and instant sparkling water using unique touch screen technology.

**Quatreau is made from solid 316 stainless steel
avoiding the environmental impact caused by plating**

QUATREAU SMARTTAP™

The Quatreau SmartTap is a compact counter-top water system perfect for the butler's pantry, office canteen, gym or bar area.

HYDREAUBAR™

Cut your carbon footprint by 95% with HydreauBar, the world's only integrated bottling station that simultaneously sterilises and fills reusable glass bottles with chilled and sparkling filtered* water.

quatreau
TouchTap™

One tap, five functions – the only touchscreen tap of its kind.

Quatreau TouchTap™ is the most stylish and technologically advanced multifunction tap on the market. Its touchscreen control panel dispenses boiling, chilled, sparkling, hot and cold filtered water as standard, with several built-in safety features and thermostatically controlled temperatures.

The complete kitchen tap, Quatreau TouchTap™ assists with food and drinks preparation, hand and dishwashing and eliminates the kettle and plastic bottled water.

The stand alone drinks station ideal for drink or food prep

The Quatreau SmartTap™ compact counter-top system with an illuminated button console dispenses a choice of boiling, chilled, and sparkling water.

Designed to withstand high-use areas demands, it is the most robust and reliable system on the market, with the lowest energy consumption and highest performing insulation.

INSTANT **BOILING**

A great help in your kitchen: chosen by experts for convenience, safety and elegant design.

Providing instant boiling water on demand eliminates the need for kettles and associated time staff can take preparing hot beverages.

A Quatreau TouchTap™ or SmartTap™ provides a safer method of dispensing boiling water and an altogether more efficient use of energy by maintaining temperature and delivering only what is required.

Dispensing high volumes of piping hot water, the Quatreau TouchTap and Quatreau SmartTap meet the needs and requirements of busy offices and homes.

Everyday uses

Tea • Coffee • Blanching • Sterilising • Pre-heating • Poaching • Steaming
• Vegetable preparation

Safe handling

Quatreau Touch boiling safety function requires a three-step touch sequence to activate. Auto cut-off after 60 seconds. Outer hoop of the tap remains cool to touch to prevent scalding.

The perfect temperature

Tea and coffee are best prepared using water that's just come off the boil. Quatreau® taps deliver at the ideal temperature of approximately 204°F thereby avoiding the spitting and spluttering associated with higher temperatures.

INSTANT CHILLED

Conveniently eliminates bottled water: saves fridge space and reduces single-use plastics.

Nothing is more refreshing on a warm summer's day than beautifully chilled water from your tap. Serve in a glass jug with slices of citrus fruit and mint for the ideal accompaniment to your al fresco dining. Add a small splash of your favourite cordial for a subtly flavoured alternative.

Pastry, bread or pizza dough mixes benefit from the chilled factor. Use straight from the tap to rinse fruit and vegetables prior to preparation to thoroughly remove any residues. Prepare salads and give them a final toss in chilled water to refresh prior to serving.

Halt the cooking process. For the perfect pasta cook using the boiling function, strain and rinse under the chilled flow briefly to arrest further cooking and finally reheat under the boiling stream. For chilled shellfish or vegetables, boil for the appropriate time and plunge into a bowl of chilled water to avoid overcooking.

INSTANT SPARKLING

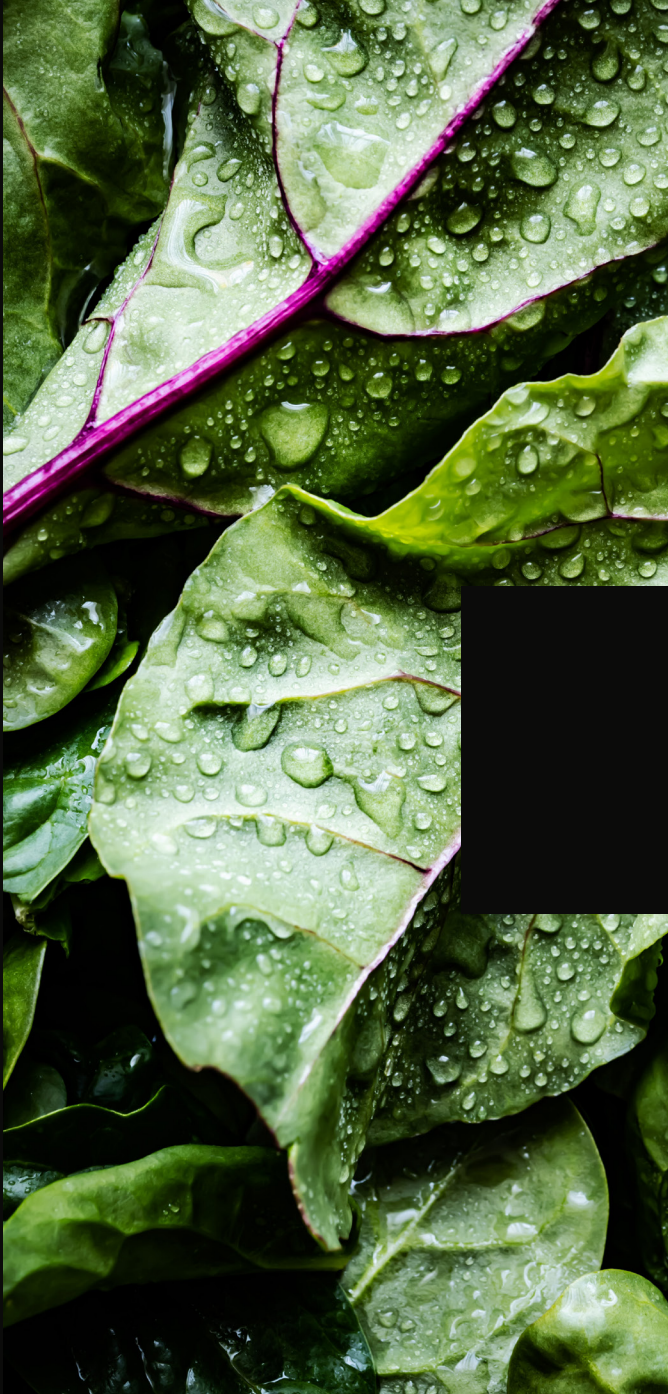

Unlimited sparkling water on tap in your home. Purer than all bottled waters.

Never has sparkling water tasted so good. Endless combinations await you and your family. As an alternative to sugar based fizzy drinks let your children create their own favourite using diced fruit and sparkling water.

Blend fruit until smooth, add the same amount of sparkling water and mix for a couple of seconds for an effervescent smoothie. Or why not try a sparkling elderflower jelly by setting your favourite berries or fruit in a jelly made with elderberry cordial and sparkling water.

Need a pick me up? Soak a flannel under the stream of sparkling water until chilled. Gently squeeze and apply to the face or back of the neck for a refreshing alternative tonic.

HOT & COLD TAP WATER

The perfect temperature everytime

Quatreau saves water by dispensing mains tap water at the perfect pre-set temperature for rinsing and washing. Simply touch the lower left quadrant once.

The temperature is thermostatically pre-set to 40°C and can be adjusted to suit your preference, delivered in a controlled stream to prevent splashing. No more scalding your hands trying to set the temperature by mixing hot and cold water. A great way of saving water.

For cold tap water double touch the same icon. It is unlikely you will need this option once you've discovered the benefits our purified boiling chilled and sparkling functions but if you do find a use let us know.

QUATREAU® SYSTEM

STYLE

FEATURES

Fits into a standard 600 mm (24") cabinet

Ventilation duct included for kick space installation

Low energy consumption

Highest performing insulation

Most robust and reliable system available

Easy to use push button control with built-in safety feature

DDA compliant controls
